Quaid-e-Azam Muhammad Ali Jinnah
Father of Nation
Unity Faith Discipline

If Pakistan is to play its proper role in the world to which its size, manpower and resources entitle it it must develop industrial potential side by side with its agriculture and give its economy and industrial basis. By industrializing our State, we shall decrease our dependence on the outside world for necessities of life; we will give more employment to our people and will also increase the resources of the state.

On the occasion of laying the foundation-stone of the building of the Valika Textile Mills Ltd. on 26th September, 1947 www.quaid.gov.pk/speech08.htm

Stall: Hall-2 : B030

Product Line

AKKO's story focuses on the recent history of the Turkish manufacturing industry. With the development of the supply industry as well as the main industry in Turkey; AKKO, named after "Abdullah Karakuş and Sons", took its first step into the industry in 1986 as a production workshop to produce spare parts. However, like the Turkish industry, AKKO was growing day by day and its production needs were increasing exponentially. When a tool he used in metal processing did not meet his expectations, lathe master Abdullah Karakuş said "We must produce this in the best possible way and show it to the whole world!". With this idea, they set out to produce industrial tools. AKKO, which had been producing spare parts until then, started to produce tools that gave the metal its actual shape. The quality of the products transformed AKKO,a production enthusiast, from a small workshop into a factory.

Today, AKKO's tools shape metal and add value to production with the "Made in Türkiye" stamp in over 90 countries.

Stall: Hall-2 : B071

Product Line:

The FAGIMA brand was founded in 1973 by Mr. Basco Fazzini in a garage in Florence, Italy, to assemble and produce ordinary milling machine owners.

Since 1990, FAGIMA began to transform the production of moving column machining centers, and the main products are moving column machining centers and digital display vertical processing

Since 2000, FAGIMA has been actively engaged in OEM cooperation with other well-known European machine tool manufacturers to accumulate experience and began to gradually transform the production of B+C type moving column five-axis machining centers, and this is the main product until today. The company currently has 27 employees.

In 2018, FAGIMA set up a branch in Chongqing, China, and authorized Chongqing Fagima Electromechanical Equipment Co., Ltd. to carry out sales business in China and the Asia-Pacific region.

COPPERGAT CABLES (PVT) LTD.

An icon of trust and reliability COPPERGAT Wires & Cables is a Value Based Organization (VBO). With over 2 decades of expertise in the field of wires and cables we have grown to be a trustworthy and reliable source for quality in the building wires and power cables industry. COPPERGAT's products are manufactured to perform their best even in the harshest of weathers. Striving for technological advancement and excellence COPPERGAT not only has made its mark in the national market but is also a well-known name in the SAARC region. Committed to innovation and originality we resolve to become a global entity.

With state-of-the-art manufacturing plant (installation of American Extrusion Lines for XLPE-PVC & LSZH) and stringent quality checks by internationally acclaimed labs such as:

STANDARDS: CopperGat Cables (PVT) LTD is manufacturing Cables according to BS-6004, IEC 60228, IEC 60502-1, BS 2004, BS 6500, IEC 60228 and BS-6004, BS 6346,6360) CopperGat Cables Manufacture Products that are suitable for all electrical operations and are guaranteed for life.

LABS: with state of art manufacturing plant (installation of American extrusion lines for XLPEPVS) and stringent Quality checks by internationally acclaimed Labs such as

PSQCA: Pakistan standards & Quality control Authority

PCSIR: Pakistan council of scientific and industrial research.

UET: High voltage costing University of Engineering & Technology.

MIRDC: Metal industry research & development center.

AGS: American Global Standards, under all applicable standards of IEC, BSS, UL83, ANSI, VDE & DIN.

PRODUCT RANGE / SIZE (0.5mm sq to 630mm sq) Multi Core.

1. Buildings Wires & Cables
2. LT power cables with CU/AL conductor
3. Armored & Un Armored Cables
4. AAC and ACSR conductor as per WAPDA Standards
5. Flexible DC cables single and multi-Core
6. Flexible special cables for Instrumentation & control
7. PVC / PVC solar cables UV Resistant Photo Voltaic XLPE/PVC, XLPO/XLPO
8. Telecommunication cables
9. RG -6, RG -7, RG -11, RG -213 etc. types cables
10. Flame retardant LSZH cables
11. Fire retardant MGT Mica Glass Tape Cables for High Temperature.
12. Cables for wind energy.
13. Customized cables, as per Customer specs.
14. Chinese Specifications.

Imported cable grade material is used in manufacturing because if copper does not have 100% conductivity, cable will have less conductivity and greater resistance which means increased electricity bills. This is the reason that our growth and operational excellence has been awarded with strong business competencies that have served as a solid foundation for our expansion. The Company has been accredited with many international and national certifications. The quality of Coppergat is also tested and certified by world's best laboratory KEMA Laboratories, Holland

DELTAPOWER
GENERATORS & SOLAR SYSTEMS

Delta Power is an official distributor of World No.1 Solar Panel Company- SUNPOWER

Company overview

Delta Power was founded in 1997 with an aim to provide efficient, economical and sustainable energy solutions. Delta Power is widely recognized for its expertise in Solar PV and back-up power solutions. Headquartered in Karachi, and having an office strategically located in Lahore. We cater to industrial, commercial and residential energy needs across the nation. We are a team of qualified professionals that have the collective vision to generate power in a way that protects & saves the planet we live in. From the very beginning, our intention was to reduce the carbon footprint and scale up clean energy generation.

Our Vision

- Offer the highest quality equipment & the latest technology in the region
- Become the market leader in the field of renewable energy
- Exceed customer expectations by anticipating customer needs
- Develop an employee culture that fosters growth, excellence and teamwork

Our Values

- ✓ We take responsibility
- ✓ We succeed together
- ✓ We seek out different perspectives
- ✓ We move at a pace and make things happen

Message

from our CEO
Team

The future of energy will look radically different to energy today. We are facing a major transition of how our energy is produced, transported, stored & used. Delta Power is committed to play a pivotal role in this transition.

The future of energy will look radically different to energy today. We are facing a major transition of how our energy is produced, transported, stored & used. Delta Power is committed to play a pivotal role in this transition.

Solar Energy is a movement of a sustainable, affordable & innovative solution.

The economics of which work better in Pakistan than in most places in the world.

We are one of the most trusted partners in the industry because of our services that involve careful selection of products & technology, product warranties & satisfying after-sales services. Our success is through our client satisfaction. We strive towards achieving best possible results & providing value greater than our price.

Stall Hall-2 : B046, B047
Product Line

Diamond Electrical Company started its journey back in 1965 as a small sized, family owned, engineering company in Gujranwala. Under the dynamic leadership of its founder Mr. Haji Muhammad Rafique, the company soon established its name in the manufacturing of quality electric motors and pumps. Today, by the grace of God, our brand Diamond Pumps and Diamond Motors is synonyms for quality and durability.

Diamond Electrical Company has always been a customer focused company. We have always valued the feedback from our buyers and have tried to improve our products to provide our customers with the best possible experience. All our products come with a limited time warranty and our after sales centres are available all accross the country to rectify any complaints in the shortest period of time. We realize that our products are used in many critical operations in residential and commercial premises and any downtime due to product failure can have a devastating impact. Therefore we ensure that all products leaving our production line are thoroughly checked for quality. We also ensure to use only the best imported raw materials and components, such as copper wires and ball bearings, in our manufacturing. Diamond Electrical Company is also the first electric motors manufacturers in Pakistan to have successfully implemented ISO 9001:2015 QMS Certification standards.

Diamond Electrical Company is a member of Gujranwala Chamber of Commerce & Industry and a founder member of Pakistan Pumps & Electric Motors Manufacturers Association. All our products are thoroughly tested for industrial and agricultural use. Our products are also thermally protected, electric shock proof with optimal performance and efficiency. Pumps and Motors can be supplied in various specifications as per customer's requirments.

Providing Renewable

Energy Solutions

- Direct Energy Pvt Ltd is a company of Direct Energy Group established to fulfil the needs of renewable energy in Pakistan.
- Engaged in providing green energy solutions for Industrial, Commercial & Consumer purposes.
- Offering complete solution including design, engineering, supply, construction, commissioning, operation & maintenance.
- To overcome energy crisis in Pakistan, we strongly believe, Green is the solution
- Certified by PEC, AEDB, PSA

PAKISTAN NATIONWIDE LICENSED
 COMPANY BY MINISTRY OF ENERGY,
 PAKISTAN

What Makes us Unique

We provide unique Solutions and Techniques to ensure the successful delivery of renewable and sustainable energy projects promptly. We deliver valuable services to our clients with

RESIDENTIAL SOLUTION

The major advantage of solar power system in a home is that it gives you the ability to produce power consistently when the sun is shining on your home

INDUSTRIAL SOLUTION

Increase in the share of renewable energy portfolio is another incentive for many big industries to use industrial solar power

NET METERING

Net metering is an electricity policy for consumers who sell the electricity produced back to the grid.

COMMERCIAL SOLUTION

The major advantage of solar power system in a home is that it gives you the ability to produce power consistently when the sun is shining on your home

AGRICULTURE SOLUTION

The major advantage of solar power system in a home is that it gives you the ability to produce power consistently when the sun is shining on your home

SMART SOLAR LIGHTS

We care how you see the world. That's why we're experts at applying cutting edge, empowering technology to be at the forefront of LED evolution

Net Metering Authorized Dealer

Net metering is an electricity policy for consumers, who own/plan to set up a Renewable Energy facility, which allows them to produce electricity (using wind and solar) for their own use and supply the excess produce to the national grid setting-off units of electricity consumed during off-peak hours or at times when the production from Renewable Energy facility is not enough to meet the consumer load.

Product Offerings

We offer solar energy solutions for all residential, commercial and industrial users ranging from 5KW to 500KW+. Our systems include all types and sizes of on-grid, off-grid and hybrid systems.

We also provide warranties on solar panels for a period of 25 years, and 5 to 10 year warranties on inverters (which can be renewed).ms.

All our customers are provided with mobile application, which helps them and our team monitor their solar energy system using Wi-Fi or data.

Monitoring & support services

Direct energy has always been committed to providing the finest customer services in town, as our customer will always be our first priority. Our highly trained team equipped with up-to date and advanced solar monitoring, is always tracking customer's solar energy system, and immediately contacts customers in case of any error or flaw.

Our dedicated customer service teams are always available for any complaints or queries on our helpline or any other medium of contact, to provide the best customer and after sales service experience.

About Us

Dongjin Group was established in 1993, headquartered in Shenzhen, China, and has 30 years of extensive experience in battery production. As a global enterprise, Dongjin Group has established eight factories worldwide. We are committed to providing high-quality products and excellent after-sales service, gaining wide recognition from customers around the world.

As a subsidiary of Dongjin Group, Pakistan Company was founded in 2019. We established our factory in 2020 and commenced product manufacturing and sales in 2021. Currently, our main products include lead-acid batteries and lithium batteries, which are widely used in electric vehicles, tricycles, home energy storage, base stations etc. Our products hold a significant position in the Pakistani market and have been successfully applied in large-scale projects such as hospitals, banks, military installations, Lahore LRT program and the Gwadar Research Center.

To meet market demands and promote sustainable development, we plan to launch a complete set of Dongjin solar energy storage products in Pakistan starting from 2023. This includes Energy storage battery, inverters, and solar panels. By providing one-stop energy storage system services, we are dedicated to reducing accident rates, addressing data compatibility issues, and delivering enhanced user experiences while minimizing post-sales requirements for customers.

Furthermore, we are actively involved in the research and development of automotive batteries and electric bikes. With the rapid growth of electric transportation, we recognize the tremendous potential in the automotive battery and two-wheeled electric vehicle market in Pakistan. We will invest resources in R&D to meet the increasing market demands.

Energy Update, a magazine launched in May 2006 to cater to the burgeoning energy and environment sector of Pakistan. This is the oldest magazine on Energy and Environment in Pakistan, and our point is to turn into a Voice of the energy business.

With 100,000 (Approx.) Readers across Pakistan, Middle East, Europe, USA, Canada, UK and Southeast Asia, the Energy Update is the sole industry magazine in the Energy Sector of Pakistan known as the 'Voice of the Energy Business'.

The magazine focuses on developments in the global energy sector with particular interest to Pakistan. It covers the developments of the energy sector including; Oil & Gas Industry (LPG, LNG), Renewable Energy, BioMass, Hydel Power, Coal and Nuclear Energy, CPEC Mega Engineering and Energy Projects of Pakistan, Climate Change & Economy.

Unbiased analysis, truthful reporting, scathing criticism, liberal praise of the positive, open receptivity to suggestions, advice and criticism are what assisted us in making Energy Update a publication that the industry is proud to call its own. Today, the monthly Energy Update is being circulated among 80,000 (8,000 Printed Version & 72,000 Through Website, Social Media & Emailing) Industry Experts (OMCs, NGV Industry, Alternate Energy, Trade Associations and Key Decision Makers at Government level) in Pakistan and Overseas Markets and other growing energy markets of the world.

For Engineering Post, even sky is not the limit

=====

Engineering Post is an elite engineering newspaper, covering all engineering sectors including contractors, consultants, architects, HVACR, electrical, automation, plumbing, builders, textile, sugar, cement, pharmaceutical and fertilizer industry with many more. We are the only publication with such a largest circulation all across Pakistan from north to south.

Founder and Managing Editor, Mr. Khawaja Zeeshan Haider, had been in the publication industry from more than 24 years. He is a business graduate from IBA, Punjab University and a hardworking, dynamic and enthusiastic business icon. Because of his management skills and novel ideas, Engineering Post in a short span has become the market leader in engineering publications with biggest ever advertising support from the engineering industry.

To bridge the gap between local and foreign players, Engineering Post is the only journal which has crossed the boundaries and started off with Middle East Electricity, Dubai, where we distribute the copies of Engineering post in order to promote the family of our advertisers among major players of the world. We are the official media partners of the leading expos and events across the globe. Engineering Post is the first ever engineering magazine from Pakistan which officially placed their stall in engineering expos abroad.

The Team matters the most. The Team Engineering Post comprises of the best human resource of the profession, a key element that took us to the no. 1 position in the industry.

We believe in the kind of customer services where the customer/advertiser is promoted in so many different and unique ways that they should feel proud to be doing business with us. Therefore, we are the proud ambassadors of biggest no of engineering brands in Pakistan.

KUVO

Hangzhou KUVO Frequency Technology Co., Ltd. is specialized in R & D, production and sales for frequency inverter, which is mostly used in industrial control field. KUVO Company also provides maintenance services, consulting and training for frequency inverter. KUVO Company is one of the most advanced, most powerful frequency inverter manufacturers, which is located in Hangzhou of Zhejiang Province. KUVO Company's leading product KUVO JHI Series frequency inverter has its own intellectual property rights. Under the premise of meeting international standards, the products also aim at the application needs of various industries, thus further enhancing the reliability and stability of the products. The products have been widely used in metallurgy, iron and steel, oil production, mining, building materials, pharmacy, chemical industry, paper making, plastics, machine tools, heating ventilating and other industries & equipment. The inverters mainly provide function of speed regulation, soft start and soft stop, improving power factors, intelligent control for types of load. At the same time, it can protect the motor and equipment effectively. It not only can greatly improve the product performance, improve the process, improve the efficiency, but also reduce the cost for the user and enhance the core value of the product.

INTRODUCTION

HM Email & Company Limited was established in 1954 as wire drawing Unit in vicinity of Mooss Lane in the Old Area of Karachi. Since its inception, the Company's Operation Motto was producing Quality Wires which were used in making jewellery, Bridal Clothes and by companies producing Domestic Wiring Cables. In the early 80's, the Company decided to move forward in the direction of Cable manufacturing and started producing Domestic Wiring and Flexible Cables at its new facility located at Syed Mehmood Shah Street in Old Haji Camp. The Company introduced its range of Cables under the Brand and Style "H.M. CABLES" In the late 80's and early 90's, the Company moved its manufacturing unit to bigger location in SITE Karachi where it ventured into manufacturing of Power Cables and Over Head Conductors. The Company got the prequalification from WAPDA, T&T, and KESC started supplying quality products to all these esteemed Government and Semi-Government Organizations. The company also entered the Commercial and Industrial Market and made its name well known in that market. Many big Commercial Projects such as Cement Plants, Textile Mills, Sugar Mills and other Major Industrial units became the Customer of H.M. Esmail & Company Limited and reason for that was the Quality and Customer Service provided by the Company. In the early 2000, the Manufacturing Unit was shifted to the new 10 Acres Facility in SITE. Kosri where the Company added Aluminum Rod Manufacturing Plant and the Medium Voltage Cable Manufacturing Plant (European Plant).

The Company also installed the State of the Art Hipotronics Testing Unit to its Quality Control in order to produce premium Quality Cables. The Company also changed its Legal Status according to the requirement of Law and became "H.M. Esmail & Company Limited.

HM. Cables, our brand name is in the market for more than 50 years now and have enjoyed impeccable records for quality and service. We have won the FPCCI trophy for Merit Export for the year 2005-2006 and 2007-2008 and have exported cables to Afghanistan, Middle East and Africa. We also enjoy the distinction of winning the Consumer Choice Award twice. Our manufacturing unit is based in Kotri Sindh and we are using state of the art equipments and highly skilled and experienced man power for producing high quality cables and conductors. We also have ISO 9001-2000 which shows our seriousness towards maintaining not only the product quality but also the process quality. Our technical and production staff is highly trained and has rich experience of working in the cable industries abroad. We follow all the major quality standards such as 11 BSS, ASTM and IEC and are member of the British Standard Institution. We constantly upgrade the quality standards and are well aware of technological changes in the cable field.

SENFENG LEIANG LASER

About Us:

SENFENG has four standardized intelligent equipment manufacturing bases. We provide high-end intelligent laser equipment and solutions with a number of fully automated production equipment and perfect quality and pioneering efficiency.

SENFENG is a professional manufacturer engaged in the research, development, production, sales and service of fiber laser cutters, fiber laser cleaning machine, laser welding machine, 3D robot, press brake bending machine and metal sander, etc.

SENFENG has set up subsidiaries and service centres in the USA, Germany, UAE, India, Pakistan and Jordan to provide localized services and technical support to global customers.

SENFENG, as a leading integrated manufacturer of fiber laser machines for cutting, welding, cleaning, cladding as well as electric bending machine, provides various solutions in the field of fabricating machinery with cutting-edge technology.

To build the industrial world of tomorrow, we have set up subsidiaries in Dubai, UAE, Paderborn, Germany and Los Angeles, the US and several service centers in major cities of India, Pakistan, Jordan.

After years of persistent probe in the field of laser technology, we are equipped with a great pool of core tech to drive automation process of modern machinery industry.

SENFENG boasts a rich legacy marked by a relentless pursuit of technological advancements. The company's extensive range of laser systems caters to a myriad of applications, including metal cutting, engraving, and welding. Its unwavering dedication to research and development has propelled SENFENG to the forefront of the industry, enabling it to deliver cutting-edge solutions that address the evolving needs of its global clientele.

With a global footprint and a commitment to sustainability, SENFENG continues to shape the future of laser technology, setting new benchmarks for precision and performance in the ever-evolving landscape of industrial applications.

Product Line: Solar Service Provider

Our journey was started three decades ago by our CEO with a vision to transform the experience of Pakistan's corporate consumers. We started our business with Philips where we achieved a record-breaking Rs.100 million in sales in the corporate sector. From there on we never looked back. Along the road we created valuable relationships and established ourselves as a leading B2B partner of renowned multinational organizations. At Intermark, we approach every day with increased enthusiasm to grow and find new avenues to improve our customer's experience. This has allowed us to diversify our business portfolio and have expertise in several sectors. We realise our responsibility of taking care of the planet and this has been the inspiration behind our newest venture of providing clients with solar solutions for energy.

Our solar energy solutions aim to harness Pakistan's true potential of alternative energy. Intermark Solar envisions that clean and sustainable solar energy is the way forward for Pakistan. As a result of this business, we will be playing a role in saving valuable foreign exchange spent on importing costly fuels for electricity generation. We do not just want Pakistan to shine, we also want to ensure that our planet is habitable for our future generations.

Khurshid FANS

SGS Electrical Company was founded in 1990 its main purpose was to manufacture "Electric Fans" under the brand name "Khurshid Fans" with a philosophy to carve out in the Pakistans and Global electric fan industry and evolve into a premier lifestyle home solutions provider.

With operations spanning over 13 countries. Khurshid Fans have earned the distinction of being the preferred choice of electrical products in terms of quality & durability for household consumers both in Pakistan and abroad.

We are committed to keeping powering the world with our state-of-the-art innovations and energy-efficient solutions. Khurshid Fan was the first company to introduce AC/DC Energy Saving Fan in Pakistan. Currently, over 90% of our product offerings are energy efficient and manufactured in-house. We work towards creating harmony between manufacturing output and efficiencies that deliver social, economic, and environmental sustainability.

Only Khurshid Fan is manufactured using Electrical Steel Sheet which ensures low current losses combining 99.9% pure copper winding and high-grade insulating material is used for the armature's long life. We are always desirous to design and manufacture the most technically advance "Electric Fans" of all types at the best possible price "and that is the standard we live by".

INTRODUCTION

KTD (Private) Limited (Kausar Trade Distributors) established in 1993, is one of the leading supplier and manufacturers' representative of industrial machinery & equipment in Pakistan. We deal in Machine Tool, Plastic Injection Molding Machines, Sheet Metal Working Machines, Metal Forming Machines, Machine Tool Accessories, Cutting Tools and Precise Measuring Instrument. Our representation includes manufacturers from Belgium, Canada, China, France, Germany, Italy, Japan, Singapore, Slovakia, Spain, Taiwan, United Kingdom and USA. The dedication, hard work and value added services of over several years, have helped to develop a large satisfied customer base across the world, showing our customers trust and reliability on product, services and technical back-up support.

COMPANY LOCATIONS AND FACILITIES

We are leading machine tool trading company among in Pakistan. Our head office is located in Karachi – the financial & industrial hub of Pakistan and branches are at Lahore and Islamabad. We have warehousing facilities at Karachi and Lahore office, where we have developed storage facility for machine tools, machine tool accessories and cutting tools. These resources make us unique in the local market and enable us to provide prompt services and on-time delivery to our valued customers.

We have well equipped Mechanical & Maintenance Workshop and electronic lab that is meant for our general maintenance, after-sale service and to rebuild machinery & equipment in order to provide on-time services and complete backup support for our supplied machinery & equipment. The Mechanical Workshop employs precision mechanics and technical experts, who service, modify, troubleshoot, repair, and test sophisticated technical problems of machines and equipment in a workshop facility in association with our foreign Principal's engineers and in addition the installation, commissioning, training and back-up support is carried out both in-house and on-site.

We have an exceptional reputation all over Pakistan for quality work delivered on minimal lead times and provide a cost effective service. We have done a wide range of projects from small to very large by providing technical consultancy and services. Our maintenance and service team, comprising of highly skilled experts and technicians all of whom have many years of experience in mechanical and electronic repairs have succeeded. Our foremost focus is to provide precise and worthy technical backup support and maintenance facilities on site reducing equipment downtime and increasing productivity of our valued customers.

KTD (PVT) LTD.

REPRESENTATION

We have a strong track record in representing reputable international manufacturers of machine tool, sheet metal working machines, cutting tools and measuring instruments. We are authorized sale agent of reputed manufacturers like, SPINNER, FEELER, NEWAY, CHMER, PALMARY, PERFECT, YUSHINE, BAOMA, DMTG, JIANGHAI, HEFEI, BODOR, HAITIAN, VERTEX, INSIZE, SANDVIK etc, and have been supplying their products in our local market.

MARKETING & SALES NETWORK

We have strong marketing and sales network that covers a variety of industries including Engineering, Automobile, Locomotive, Aviation, Petrochemical, Steel Making & Rolling Industry, Tools, Dies And Mould Centers, Technical Training Institutes, Universities and Research Centers nationwide, where our supplied machinery & equipments performing satisfactorily due to our quality equipment, strong after-sales service & back-up support.

TECHNICAL SUPPORT & SERVICES

Historically, we have also built our business in the field of technical support & service, trouble shooting, repair and maintenance of all types of machine tools, sheet metal working machines, metal forming machines & equipment in Pakistan. We are professional technical support and service provider of industrial machinery & equipment. We are capable of on-site installation and commissioning by our professional and well trained experts and as well as Principal's engineers, endeavoring a complete project through from supply to completion of operational and application training of the machines and equipment, not only saves cost and time, but ensures that the highest quality of work and productivity is maintained. Further apart from this we also provide foreign training at OEM/ manufacturer's premises that is a part of our general training facilities.

We provide exclusively technical support & services to the industries that includes:

- Installation & Commissioning of the Machines
- Testing of the Machines
- Operational & Maintenance Training of the Machines
- Repair and Maintenance of the Machines
- Complete after sales service and backup support including trouble-shooting and solution of other technical problems.

We deliver a full spectrum of technical knowledge, backup support, services and solutions that allow our customers to automate their work professionally in the industry.

WAREHOUSING & INVENTORY

We have developed a comprehensive inventory & storage facility to ensure operation of supplied machinery with least possible downtime. We have sufficient inventory in our stock that covers a complete range of machine tools accessories, cutting tools & blades, pneumatic saws, consumable items and accessories. In addition a complete range of spares and accessories of CNC Machines, are in ready stock that make us unique in local market.

As we embark on this journey of introducing you to the extraordinary world of Maverick Energy. We present Maverick Energy, a beacon of innovation and excellence in providing custom-made alternate energy and power solutions modified exclusively to meet the dynamic demands of the industrial and commercial markets.

With a commitment to innovation and excellence, we offer a range of services to meet your requirements, including used generator sales, new generator sales, rental services, expert overhauling, and spare parts availability etc. As we expand the profile of Maverick Energy, we are thrilled to introduce our cutting-edge solutions in solar energy and energy storage systems (ESS).

Recognizing the increasing demand for sustainable and renewable energy sources, Maverick Energy has taken a leap into the extraordinary world of solar power, contributing to a greener and more sustainable future.

Our rich legacy as a trailblazing force in the renewable energy and power solutions industry extends over many years of groundbreaking achievements.

Maverick Energy stands high as an eminent leader, driven by a firm commitment to delivering cutting-edge technologies, coupled with an unparalleled dedication to providing top-notch products and services.

SAFE, RELIABLE, DURABLE, ECONOMICAL

Pak Engineering and Automation comprises a number of highly qualified individuals with a unique combination of backgrounds in research and practical implementation experience in their fields of expertise. This unique combination enables us to implement the best available technology in an applicable, appropriate and practical way in developing industries/plants.

In addition, We have a proven track record in the project management (planning, design, implementation, maintenance and operation) of Mechanical and Electrical engineering infrastructure for developing Industries and Plants.

Our Mission:

The mission of Pak Engineering and Automation is to provide engineering and technical solutions that are responsive to our clients needs in an innovative, cost effective, professional, quality service manner. We will accomplish this by utilizing our common values and in achieving our business objective of having you as a satisfied client. To be as responsive as possible to the needs of our clients, one principal/associate oversees and manages each of our market sectors. Achieving business objectives is the result of an empowered, values driven work force which is motivated to succeed. Our common values define a culture where our people are set free to be the best they can be. They define an environment where we are motivated to respond quick to client needs, to discover new ways to solve problems and to make responsible decisions on behalf of the company. People with the freedom and responsibility of our common values give us a powerful competitive advantage.

Trust We believe everyone embracing the values of the firm will do what is best for the client, each other and the business.

Mutual Respect: We treat everyone with dignity and courtesy.

Teamwork: We recognize the potential for teams to produce superior results over what team members could achieve as individuals.

Sense of Urgency: We recognize time as a competitive advantage.

Risk Taking: we accept and encourage informed risk taking.

Continuous Improvement: we recognize everything we do as a process that can be eliminated, simplified or improved.

Commitment: We deliver what we promise to each other and to our clients.

Client Satisfaction: We delight our clients by exceeding their expectations.

PEA LPG VAPORIZER SYSTEM RANGE 10 Kg/hr. to 500Kg/Hr.

PEA LPG Vaporizer is a system that converts Liquefied Petroleum Gas to Vapor form. It allows you to utilize 100% of LP-Gas in your tank/cylinder, decreasing delivery frequency and overall costs of LPG.

PURPOSE OF USE & BENEFITS:

- Allows you to utilize 100% of LPG Gas to save cost.
- Eliminates cylinder/tank "freeze-ups" particularly in winter, result in production losses or delays.
- All Safety and protection devices are built-in to reduce safety risks for human & equipment.
- Very Easy to maintain & operate with containing less space.
- Can use with mixture of Natural Gas & LPG.

Pearl Energy is a renewable energy company that aims to decarbonize the Middle East and Pakistan through the provision of affordable and sustainable clean energy solutions to households and businesses. Our mission is to build a distributed energy ecosystem that offers efficient, resilient, and reliant clean energy solutions, while our vision is to lead the regional decarbonization drive through innovation, technology, and technical expertise to resolve the most daunting challenge of this century. We offer bespoke solutions to clients, which makes us unique. We believe that the soaring cost of electricity and increasing environmental hazards have compelled households and businesses to transition to clean energy, and we ensure a smooth transition to clean energy by offering the most suitable solar solutions to clients. Pearl Energy uses micro-inverter technology, which maximizes power generation for each module in the PV array, boosting system efficiency by up to 20% compared to conventional "string" systems. Our solar systems generate more power under all weather conditions and come with longer warranties. Pearl Energy aims to provide a sustainable energy future by offering the most intelligent solar solutions to meet domestic and commercial energy consumption in a reliable, efficient, and affordable manner.

PIONEER CABLES LTD.

 Product Line

A Brief Profile

PIONEER CABLES LIMITED

Pioneer Cables, established in 1980, is an ISO 9001:2008 certified company engaged in the manufacturing of H.T./ L.T. Power Cables, Conductors & General Wiring Cables according to inter-national standards.

Pioneer Cables is the flag ship company of Bawany Group, a well-known and trusted name in Pakistan with a rich history of success and good business ethics that goes back 100+ years. Our sister concern, Bawany Metals Limited is the FIRST in Pakistan to manufacture 99.9% Copper Rods conforming to ASTM B-49. It also produces 99.5% Aluminium Rods conforming to ASTM B-233.

Our manufacturing facilities are based at Hub Chowki, Balochistan about 30 KM from Karachi and occupy 52,600 sq. meters of prime manufacturing space with associated management and design offices, laboratories, quality control and other departments.

Pioneer Cables is committed to the production of the best product quality utilizing cutting edge European technology in production processes, material applications and logistics procedures. We have the capability to provide a versatile product range to serve individual home consumers as well as the construction, electric utilities, distribution and industrial sectors.

The Company is managed by qualified professionals specializing in different fields. Most of the heads of technical and manufacturing departments have been trained at the plant of AEI Cables Ltd, Gravesend, U.K. Improvements in facilities and upgrading of equipment is a continuing process at our plant.

We are the Pioneers

We are Registered with almost all government, semi-government Organizations in Pakistan i.e. WAPDA, K-Electric (formerly KESC), MES, FWO, POF, PAEC, NDC, DHA, OGDC Multinational Companies like Nestle, Unilever, Siemens etc. & Prestigious Industrial Groups, Housing Schemes and Commercial Plazas.

Pioneer by name.

Pioneer by deed.

With over 30 years of cable manufacturing Pioneer Cables has the honour to be the 1st:

Unit in Pakistan to bring the technology of manufacturing XLPE 15 kV grade cables with the technical collaboration of AEI (U.K.) in 1980.

To produce Jelly Filled Telephone Cables up to 1200 pairs by sister concern Pakistan Telephone Cable in 1983.

To have Copper / Aluminium Rod manufacturing industry by sister concern Bawany Metals Limited in 1983. Pakistani manufacturer having the privilege of cable testing in KEMA Laboratories, Holland in 1984.

Cable manufacturer to have cables successfully type tested at the prestigious HV & SC Testing Laboratories, NTDC Rawat.

Manufacturer to produce Triple Extruded H.T. XLPE / 15 kV cables as per IEC-60502-2 and KESC specifications-123 (the latest in cable technology) in 2008.

To use 100% prime quality Copper / Aluminium Rods (made by our sister concern Bawany Metals Limited) and genuine imported insulating material.

Cable manufacturer with in-house testing facilities in the most modern laboratory in Pakistan for all its products handling various types of tests.

...And the ONLY Pakistani manufacturer to be awarded ISO 9001:2008 Certification for making up to 33 kV grade cables (the highest electrical rating manufacturing and testing facility in Pakistan).

Introduction

Power Technology International is a well-known name in the Information Technology industry for Uninterrupted Power Supply(s), Inverters, Stabilizers, Batteries, Generators, Solar & Wind energy.

Since inception, we have maintained continuous and remarkable growth in a tough and competitive market. Consistent growth of a company speaks volumes about the organization, its products, services and the people who work there.

PTI today employs over 80 highly qualified, motivated and experienced staff at over 21 locations all-across from Karachi to Kashmir. Member of;

- ♣ Karachi Chamber of Commerce & Industry
- ♣ Pakistan Engineering Council
- ♣ Alternate Energy Development Board.

Our Products

- ▣ Uninterrupted Power Supply (UPS)
- ▣ Smart Data Cabinet
- ▣ Solar & Non-Solar Inverters
- ▣ Solar Panels & Mounts.
- ▣ Batteries
- ▣ Isolation transformers
- ▣ Stabilizers – AVR (Automatic Voltage Regulator)
- ▣ Alternate Energy – Solar & Wind power
- ▣ Generators

Our Brands

- Schneider Electric - USA
- General Power Systems – USA
- American Solar - USA
- IREM Stabilizers – Italy
- Powercare – China
- Yuasa Batteries – Japan
- Newmax Batteries – South Korea
- Sacred Sun Batteries - China
- Vision Batteries – Vietnam

Product Line Solar Panels

Qin Chuangyuan adheres to the core of incubating, transforming, and industrializing scientific and technological achievements, encourages active participation from various universities, research institutes, enterprises, and cities (districts), takes accelerating the deep integration of industrial and innovation chains as the main line, takes the Western Science and Technology Innovation Port and Xixian New Area as the main window, and the entire province's high-tech zone as an important component, takes projects and platforms as the focus, breaks through talent construction and mechanism innovation, and creates a good innovation ecosystem as the guarantee, Strengthen the openness, aggregation, and optimization of innovation resources, and build Qinchuangyuan into the overall source and platform of innovation driven development in the province, and become a powerful engine for high-quality development in Shaanxi. As the main window of Qin Chuangyuan, Xixian New Area undertakes the important functions of "presidential planning, overall traction, overall service, and overall demonstration" in the construction of Qin Chuangyuan. Xixian New Area was established in 2011 and was approved by the State Council as the 7th national level new area in 2014, with a planned area of 882 square kilometers, including five clusters: Fengdong, Fengxi, Qinhan, Konggang, and Jinghe. The Xixian New Area is an important carrier area for promoting the integration of Xi'an and Xianyang. It shoulders the major mission and special status bestowed by the state, actively practices pioneering and pioneering measures, and has been approved for 20 national pilot projects, including the China (Shaanxi) Free Trade Pilot Zone and the National Airline Economic Demonstration Zone. Nowadays, the cohesion, attractiveness, and influence of Qin Chuangyuan's main window are constantly improving. The preliminary formation of the Qin Chuangyuan phenomenon, the creation of the Qin Chuangyuan ecosystem, the exploration of the Qin Chuangyuan model, and the creation of the Qin Chuangyuan plate have achieved outstanding results in the construction of the Qin Chuangyuan.

Who We Are

Conceived in 1957, Rafiq Engineering (PVT.) LTD. is recognized in the industry as a leader for its parent brand Royal Fans. We have been manufacturing superior quality fans, washing machines and room coolers for over 60 years; striving for utmost standards and value for our esteemed customers. Our products and services aim for reliability, energy efficiency and optimum performance. We feel proud in being the manufacturers of Pakistan's best-in-class ceiling fans.

All of this would not have been possible without the endless support and arduous work of our talented team members. They are always encouraged to keep abreast of the ever-evolving market trends and technology developments. Their learnings are then incorporated in the production process to guarantee the finest for our consumers.

Built with sheer diligence and an example of state-of-the-art production standards, our product line consists of:

- Royal Lifestyle Series
- Royal Smart Series
- Royal Deluxe Series
- Royal Washing Machines
- Royal Room Coolers

HISTORY

It all started with a humble beginning in 1957, when our founding father Shaikh Rafiq Ullah laid the foundation of what was soon to become the industry leader and the namesake for high quality products – a company named Royal Fans. Ever since, our products have been able to deliver on the promise of lifetime partnership. To prove this testament further, we became the 1st and the only brand to-date offering Lifetime Guarantee.

With over 60 years of customer satisfaction, Royal is the leader in fan industry today!

Sage-Tech International Founded in the year 1999, Sage-Tech International is the leading importer and supplier of high-technology products that provides solutions of security, industrial hygiene, and safety, environmental and occupational health instruments for the use of Law Enforcement Agencies, Oil & Gas sectors, research and monitoring fields in Pakistan.

A diverse clientele has enabled us to become experts in a range of the most effective security technologies and to maintain a national network both for sale and service representatives. To meet the growing need for security services, Sage-Tech International has been organizing technical training nationwide to discuss the universal principles of the product and the advanced problem of their technological equipment. Being an innovative and dependable industry leader, Sage Tech International has attended more than 100 international exhibitions conferences and seminars, in the last 15 years.

Proven to deliver real-time security monitoring, Sage Tech is an exclusive agent and distributor of renowned security products manufacturers such as CEIA SPA - Italy, Gilardoni SPA -Italy, ACO Electronic – UK, LEIDOS – UK, Cometa – Italy, FLIR – USA, SDMS- UK, Santor- USA.

We also deal in products related to safety and industrial hygiene and are the authorized distributors of worlds renowned manufacturers such as Honeywell System – USA, RAE System (USA), BW Technologies, Sonatest (UK) SKC LTD. -UK, IMR Instruments -USA, Gastec Corporation-Japan, TSI – USA, Airborne Lab – USA, IST- USA, SIP Analytical – UK

It is evident from our transition from being a small fish in the pool to one of the biggest names in security and services that we aspire to be the leading importers and service providers of security and safety products in Pakistan. Our vision is to be responsible for introducing world's cutting edge technological safety and security products in Pakistan. Our goal is to be one stop service and solution providers and serve Pakistan within best of our capabilities.

Our Challenge

On every case, we look at the business form a chief executive's perspective. We start by asking the right questions, and then dig deep into the numbers to unearth the eight solutions. We don't settle for off-the-shelf solutions, our approach and recommendations are highly customized. We help clients decide where they want to go, and how to get there. And we don't stop there. We make sure those decisions get translated quickly in to action and the client's team can sustain the momentum into the future. We commit to leaving organizations stronger than when we arrive.

Our company is a professional manufacturer of Industrial Automation Products. We are a professional manufacturer of High Quality Frequency Inverters, AC Drives, Speed Drives, VFD (Variable Speed Drive), VSD (Variable Speed Drive). They are electronic devices that can turn DC to AC. It is used for Speed control for motor and energy saving.

Our company also Manufactures;

1. Solar Pump Inverter
2. Medium & Low Voltage Inverter
3. Synchronous motor drive
4. Dedicated Inverter
5. Air Compressor
6. Soft Starter
7. Servo Drive
8. PLC
9. HMI

Pakistan's Emerging Talent Engineering Services

Smart Group Smarter Work

AN EMERGING ENGINEERING CONSULTANCY AND SERVICES GROUP IN THE COUNTRY FOR SMART AND ENERGY EFFICIENT SOLUTIONS BY UTILIZING MORE THAN 25 YEARS OF EXPERIENCE IN ENGINEERING SERVICES WITH THE INDIGENOUS RESOURCES OF PAKISTAN

OUR SERVICES

- ELEVATORS
- SOLAR SOLUTIONS
- HOME AUTOMATION SOLUTIONS

Smart Group deals in German, Italian, Chinese, Turkey & USA Brands

OUR PROJECTS

SMART SOLAR SYSTEM (PVT) LTD is a customer-oriented company, that provides customized solar energy solutions, keeping in view individual client's needs and wants. Our super dynamic team of self leaders feels pride and honor in serving our clients as our family.

As a frontrunner in the solar energy industry, we stand at the forefront of innovation, offering cutting-edge solutions that transform the way we think about energy. We aim to empower individuals and organizations with the means to reduce their carbon footprint, cut energy costs, and contribute to a healthier planet.

SMART ELEVATORS, your premier partner for top-quality elevator solutions and services. With a strong commitment to excellence and innovation, we take pride in being a leading player in the elevators industry. Our dedication to delivering superior products and exceptional customer experiences sets us apart as a trusted choice for all your vertical transportation needs..

SMART HOME, Our mission at Smart Home Automation is to lead the way in the home automation industry by providing cutting-edge solutions that transform houses into smart homes. We are committed to offering a comprehensive range of products and services that cater to the unique preferences of each individual, while also contributing to energy efficiency and security. With a dedication to innovation, quality, and customer satisfaction, we aim to make smart home technology accessible to everyone, creating a more connected and harmonious living experience.

Product Line

Sunshine Energy (Xi'an) Co., Ltd. is a holding subsidiary of Sunshine Energy (Hong Kong) Co., Ltd., mainly committed to the development of the new energy industry. The company has rich experience in project investment, development, design, construction, operation, and maintenance;

Since its establishment, the company has adhered to the "dual carbon" goal as the guide, focused on market demand, and regarded technological innovation as the driving force for enterprise development; As of now, the company has invested in and constructed more than 210 industrial and commercial distributed photovoltaic power stations in Beijing, Shanghai, Tianjin, Shaanxi, Sichuan, Guizhou, Shandong, Anhui and other regions, with a total installed capacity of over 200MW; We have established deep cooperative relationships with well-known domestic enterprises such as JD Group, Chery Automobile, Nantong Sanjian, Jingyi Copper, Anhui Construction Engineering, Jiefeng Power, Bertek Automotive Electronics, Zhang Hengchun Pharmaceutical, DAO Automotive Products, and Wuhu Ruitai Automotive Parts. The group has nearly 60 project companies with a total investment of over 1 billion yuan;

The company has always taken deep cultivation and expansion of the industrial and commercial distributed photovoltaic power station as a breakthrough point, continuously expanding the market map of the new energy field, and laying a solid foundation for gradually realizing the layout of industrial and commercial energy storage, charging and swapping power stations, low-carbon and zero carbon industrial parks, and microgrid construction;

In the future, we will use technological solutions to convert the green and clean energy produced by the microgrid into new smart new energy. While meeting our own energy needs, we can not only help the national power grid reduce peak and valley loads, dispatch and adjust peaks, but also solve a series of pain points such as comprehensive energy consumption and carbon emission assessment indicators for enterprise parks for local governments. This will help governments at all levels achieve their goals of carbon peaking and carbon neutrality.

Product Line: Deals in Manufacturing and Sales of All Types of Electric Energy Saving Fans
under the name of "Tamoor Fan."

Brief History:

Tamoor Fan - Tamoor Fan Company commenced its operations on a modest scale in 1984. Recognizing the need for quality electric fans, the company officially registered itself in 1988 as "Tamoor Fan." Since then, Tamoor Fan has been dedicated to producing high-quality electric fans designed to save energy and provide comfort.

Certifications:

- Pakistan Standard and Quality Control Authority (PSQCA)
- Production test reports by PCSIR 17025 Accredited Lab
- Pakistan Energy Label (3 Star rating for fan, awarded by NEECA)
- ISO 9001-2008 (Environmental Certification)
- ISO 14001-2004 (Management System)
- ISO 50001:2011 (Energy Management System)
- Qualifying international standards for export, including SASO – IEC and SABS.

Research & Development:

Tamoor Fan maintains a robust in-house research and development department. Our dedicated engineering team continually works on innovation and troubleshooting in the manufacturing process. We proudly collaborate with esteemed institutions such as UH, NED, TMUC, NUST, and UET to drive advancements in the industry.

Range of Sale:

Local Sales:

We have established an extensive sales network across Pakistan, encompassing distributors, dealers, and sub-dealers. Our sub-sale services extend to all major regions of the country.

International Sales (Export):

Tamoor Fan has successfully ventured into international markets, serving regions including Iran, Yemen, UAE, Kuwait, South Africa, Afghanistan, and Bangladesh.

Major Clients:

Our commitment to quality has earned us a loyal customer base, including prominent names like:

- Service Industries Ltd. Gujrat
- Nasir Madni Trust Orphanage
- Central Jail Gujrat
- Green School System
- Faizan-e-Madina
- The Educators School System
- Sundas Foundation

Vertron Technologies Pvt. Ltd. established in 2021, is high tech enterprise specializing in production development and marketing of frequency Inverter and complete sets of industrial automation products. Vertron Technologies has established perfect R&D department and has its own first-class technical qualification, strong technical service platforms and a complete quality management. Later on, We take a pride of Pakistan's largest inverter manufacturers company that manufactures high quality and reliable frequency drives for three phase AC motors widely found in equipment manufacturing industries , Elevators, Chemical, Steel mills, Oil and gas, Plastic molding, Drawing machines, Fabric printing, Solar energy,Air compressors and so on.

Vertron Technologies is a pioneer in the inverter manufacturing industry deal in manufacture of high performance universal inverters, Sensor less vector control inverters, Close loop vector control inverters, Inverters for PV Pumps, inverters for Elevators and special purpose Ring spinning inverters as per the customer's requirements.

We use high quality and precise components for our product with the capacity of manufacturing up to 20,000 unites annually with ratings 0.75KW to 2MW low voltage frequency drives.

MISSION:

To focus on customer values by providing best quality products and services in the most effective and innovative ways.

VISION:

To develop a reputation in the power industry as the most trusted reliable partner and to provide more sustainable future for the new generation.

CORPORATE PROFILE:

Pak Fans is a well-known brand in Pakistan, specializing in the manufacturing of high-quality fans. Established in 1945, the company has been providing superior cooling solutions to millions of households and businesses across the country for over seven decades.

Pak Fans holds the distinction of being the first indigenous ceiling fan manufacturer in Pakistan. Over the years, the company has consistently upgraded its technology and production facilities, ensuring that its fans are not just efficient in cooling, but also aesthetically pleasing.

The manufacturing range soon was not limited to fans only, but increased drastically as other viable products like washing machines and dryers, enameled copper wire and room air coolers were also started manufacturing under the umbrella of another brand name. PAK HOME APPLIANCES.

Pak Fans has proven itself as a reputable and trustworthy brand in Pakistan's fan industry, and continues to set the standards for quality and innovation. Through its commitment to sustainability and modernization, Pak Fans continues to grow and expand, providing customers with products that are energy-efficient, reliable, and convenient. The company's vision remains focused on creating a sustainable future while meeting the ever-changing needs of the customers.

In addition to delivering exceptional products, Pak Fans also places a great emphasis on customer satisfaction. The company has built a large network of dealers and service centers throughout Pakistan.

The company is now recognized as one of the best fan manufacturers in Pakistan, with a customer base that spans beyond the borders of the country.

PAK VISION

The company's vision is to create an innovative and sustainable future for its customers by providing them with high-quality and energy-efficient fans. Pak Fans strives to promote social and environmental responsibility in all its operations and develop products that cater to modern needs and expectations of the customers.

PAK MISSION

Our mission is to fulfill the needs and expectations by delivering reliable, world class yet affordable products consistently to our customers.

WUHAN HUAGONG INTERNATIONAL DEVELOPMENT CO., LTD.
